Career Objective

I am a passionate programmer with strong problem-solving skills and a creative mindset. I enjoy writing clean, efficient, and scalable code to build innovative solutions. My expertise lies in web development, databases, and logical programming. I strive to continuously learn new technologies and apply my knowledge to create impactful real-world applications.

Education

Bachelor of Technology in Computer Science and Engineering

Ideal Institute of Technology | 2024 – 2028

Key Courses: Essentials of Hardware & Software, Programming in C/Python

Skills

- Programming Languages: Python, Java, C++, JavaScript
- Data Structures & Algorithms: Strong foundation in problem-solving & optimization
- Database Management: SQL, MySQL, MongoDB
- Web/Software Development: Frontend & Backend development, responsive design
- Version Control: Git, GitHub
- Debugging & Testing: Creating reliable software, error detection and prevention
- Problem-Solving with Logic: Applying mathematical & logical reasoning

Projects

Personal Portfolio Website

Showcases skills, projects, and my journey in technology. Highlights mini-projects in web development and programming.

Snake Game

Classic arcade-style game where the snake grows longer after eating food. Features simple graphics and interactive controls.

Flash Card App

Helps users learn by flipping cards with questions and answers. Tracks progress and supports studying vocabulary, formulas, or trivia.

Quote Generator

Displays random motivational or funny quotes. Fetches from an API or preset collection for daily inspiration.

Email Automation

Sends personalized emails to one or multiple recipients. Useful for reminders, newsletters, and notifications.
